Market Comment

On Friday the market experienced an expected rise, after many reassuring declarations from EU officials that Greece may not need to use an outside support to tackle its fiscal deficit problems. The market's reaction though, came only at the last hour of trading. The General Index gained 3.40%, paced by banks' spectacular performance (+7.14%). Turnover reached €242 mn, with National and Alpha Bank accounting for half of it, while from mid caps Jumbo's turnover reached high levels for a third session in a row. From the FTSE Athex 20 Index only PPC and Hellenic Petroleum lost some ground, while on the other hand 9 stocks gained more than 5%, namely all the banking stocks and Viohalco.

The mood in international equity markets was positive on Friday and this morning in Asia. European equity futures this morning are trading in positive grounds. Given the large size of the announced support plan for Greece yesterday, we expect a strong positive reaction in the Athex today, especially for bank stocks, triggered by a possible reduction of Greek bond yields.

Highlights

Economic News

- EU – IMF Greece Support plan** Eurogroup agreed yesterday on the details of the Greek government support plan in case Greece's access to the markets to raise funds is not successful. An amount of €30bn will be contributed during the first year from Eurozone countries through bilateral loans to Greece for three years. The interest rate will be 3M Euribor + 300basis points + 50 basis points to cover costs. If fixed interest rate loans are chosen, the interest rate will be around 5%. An additional amount of up to €15bn will be available from IMF, for an interest rate below 3%. The details of the IMF's contribution are going to be agreed today in Brussels with EU officials. Additional amounts would be available for the current and two additional years if needed. The support plan will be activated only if Greece applies to use these funds. Greek government yesterday declared that Greece has not asked for the activation of the mechanism.
- Fitch** Downgraded on Friday Greece's credit rating by two notches to BBB- from BBB+, retaining also the negative outlook. The rating action came as a surprise, given mounting talks in Europe about the EU-IMF's support plan for Greece being activated soon.
- Fitch** following Greece's sovereign downgrade, it downgraded the five biggest Greek banks assigning a negative outlook. NBG, Alpha Bank, Eurobank, Piraeus Bank were downgraded from BBB to BBB-, while ATE Bank from BBB- to BB+.

- Gek Terna** Within the week Heron 2 the 435MW gas fired private power production unit is reportedly expected to enter into testing operation. It is the second thermal unit after the 147MW Heron 1 of Gek Terna (jointly controlled by the company and Gaz de France with equal participation).
- AB Vassilopoulos** The Voluntary offer of Delhaize for the company will last from April 14 to May 12.

We use a scale of 1 to 3 to describe Low, Medium, High risk respectively, also taking into account qualitative factors.

When a rating is applied on an IPO, the scale 3 - "High Risk" is applied for a 12-month period.

Income Rating

An Income Rating is produced, based on the forecasted dividend yield for a 12-month period. This is then compared with the YtM of the 10-yr Greek Government bond, as shown below:

Income Measure	Definition	Quantification
Equity Div. Yield	Relative performance w.r.t. the 10-yr Greek Government bond	More than 50bps
		Within the range [-50bps, +50bps]
		Less than 50bps
		No dividend
		<i>High Div. Yields</i> <i>Medium Div. Yields</i> <i>Low Div. Yields</i> <i>No Cash div. Yields</i>

We use a scale of 1 to 4 to describe Low, Medium, High and No Div. income rating respectively.
