- Very strong figures from China overnight: Real GDP (11.9% YoY), Retail Sales (18% YoY), Industrial Production (18.1% YoY) and Fixed Assets Investments (26.4% YoY).
- Commodities strengthening and USD dropped – also due to muted US CPI figures yesterday.
- S&P500 broke and closed above 1200 yesterday and next big level is 1229 in the cash index (61.8% Fibo). We have a “buy on dips” stance today US Industrial Production could surprise positively.
- Fed’s Beige Book: A cautious optimism, but not very upbeat. Message is a broadening recovery at a slow pace. The Fed is especially debating the “extended period” clause for interest rates and how to get rid of it.
